

OUR SUSTAINABILITY POLICY

As part of the City of Stockholm, our mission is to promote Stockholm as one of Europe's top destinations for meetings and events. Another important aspect of this mission is to help strengthening the competitiveness for business and industry in our region. To fulfil the mission, we need to run a sustainable business contributing to a more sustainable society.

Sustainability means taking into consideration the needs of both current and future generations, and taking long-term responsibility in our daily operations. An active approach on sustainability issues is a natural part of Stockholmsmässan's operations and a prerequisite for achieving high customer satisfaction, high profitability and attaining the company's goals. We strive to create value by developing products, solutions and services that combine social, environmental and economic aspects. A prerequisite for customers, partners and owners to have confidence in us is that we exercise good judgment when conducting our operations and that we comply with applicable laws and regulations. In dialogue with our employees, customers, visitors, suppliers and other stakeholders, we work with continuous improvements to develop a more sustainable meeting industry.

Stockholmsmässan's sustainability work is conducted on the basis of three focus areas:

Sustainable Community

Stockholmsmässan shall be a safe and secure place for anyone who visits or works at our events, regardless of whether you are an employee, a supplier, a customer or a partner. We actively work on occupational health and safety issues and competence development. We strive for a gender-equal, tolerant work environment with diversity and inclusion, as well as good working conditions, where discrimination is not tolerated. We have zero tolerance against all forms of harassment. It is through our employees' commitment, development and expertise that we create a culture, with world-class service, where employees, customers and visitors feel welcome. Stockholmsmässan plays a significant role

Sustainable Community

Sustainable Innovation

Sustainable Environment

for the hospitality industry in the Stockholm area and the society at large. Through our social commitment, we want to contribute to a better and more sustainable society.

Sustainable Environment

Energy efficiency is of utmost importance to us. We also focus on efficient resource utilization, promoting circularity and reuse, reducing waste generation, and minimizing food waste. Our goal is to offer environmentally friendly services to our customers. Our long-term objective is for our operations to become climate-positive. We continuously work to reduce our carbon footprint through measures implemented across all aspects of our operations.

Sustainable Innovation

We promote innovative business development, long-term sustainable financials and a business-oriented approach. As a financially stable business partner, we create security for both customers and suppliers, at the same time as a strong financial position makes us a more attractive employer.

We create customer value by being there for everyone who wants to stay ahead in a changing world. Stockholmsmässan collaborates with suppliers who share our values and we strive to set sustainability requirements for relevant suppliers.

We take a zero-tolerance approach to bribery and corruption and we are committed to conducting business with the highest ethical standard.

Each employee at Stockholmsmässan is responsible for reading, understanding and complying with this Sustainability Policy. The policy should also serve as a guide for suppliers, partners and other stakeholders.
